

CoReSh compendium ranking — WT_heat_up signature

top 5 public mouse GEO datasets by pctVar | query = Q_sig_WT_heat_up | PROVISIONAL - inferred sample mapping

How to read: each bar = one public GEO dataset (GSE accession); length = pctVar (%); rank = 1 is best.
pctVar is a PCA-inspired co-regulation score: high pctVar means the query gene set co-moves across samples in that dataset.
PROVISIONAL - inferred sample mapping (Hspa1b/Hsph1 thermometer + Cgas), pending collaborator sample sheet
