

Hif1a target contribution across the ranked regulon, WT: heat (39 vs 37 °C)

All 353 Hif1a regulon members, ranked by signed contribution (sign(mor) x t_wt); colour marks the coarse regulon class, and the four members of the hypoxic HIF core (Pdk1/Bnip3/Bnip3l/Car9, teal) sum to -8.46.
Class shares of the aggregate signal: 91.8% other | 10.4% shared/glycolytic | -2.2% hypoxic HIF core (fig3l splits 'other' finer).
