

GATOM metabolic-module summary

SGMWCS modules · 4 headline contrasts · kegg network · k.gene = 50 (Combined KEGG+Rhea n/a)

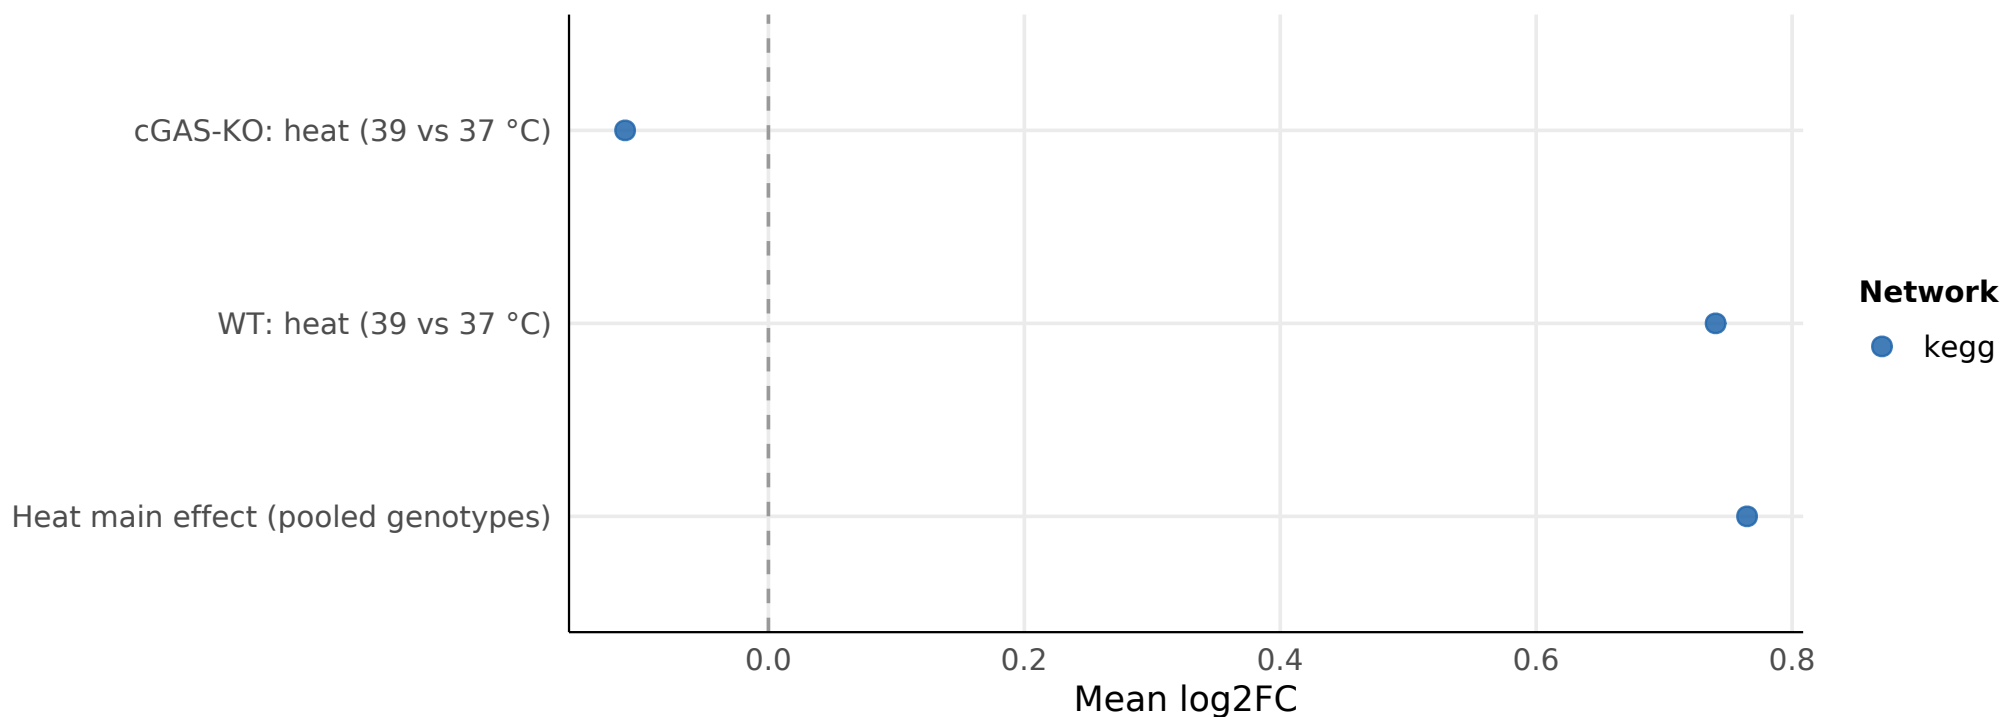

Module size

Reaction edges

Module direction

Mean enzyme log2FC (pseudo-NES)

Top: module size (reaction edges). Bottom: mean enzyme log2FC (pseudo-NES; positive = net up-regulation). Same contrast ordering in both panels.

Claim tier L3 (enrichment statistics; mechanism is interpretive text). PROVISIONAL - inferred sample mapping (Hspa1b/Hsph1 thermometer + Cgas), pending collaborator s
